## Returning Optimism

THERE is no question but that America today holds more optimism than at any time since the depression began. People at last are beginning to believe that the end of their troubles is, if not actually at hand, at least in plain sight. The administration is acting with speed and determination, and Advance Showing Given the people are giving it a support such as few administrations for Picture, Now Playhave ever even hoped to receive.

That much of this optimism is justified seems pretty certain. The only danger is that we carry it too far, so that we forget that many weighty problems still remain to be solved. The upward climb has begun, but it is probably going to be a long one and a hard one, and we shall probably be asked to make further sacrifices before it is accomplished.

We need now to guard against over-confidence.
